BRIEF · REQUEST FOR QUOTATION · OCTOBER 2026

Move Beyond Tournament System & Move Score

A multi-sport tournament platform (padel, tennis incl. nations team events, chess and other games sports) with live scoring, venue screens and a companion mobile app. We are requesting quotes for a functionally equivalent build. The full technical requirements document accompanies this brief.

What the system does

Area	Key capabilities
Organisations & roles	Multi-tenant clubs/organisers with strict data isolation; apply/approve; owners, admins, managers, referees, operators; Google/email staff login, referee access codes, invite links, audit log.
Tournament management	Events and event groups, courts, teams/players (CSV import), groups and round robin, knockout brackets with Plate and placement draws, order of play with rain delay, check-in, clone, Excel export, sponsors and branding.
Tennis team events	Nations ties (S2, S1, Doubles) under the 2026 ITF team regulations: line-ups, order-of-merit checks, ITF ranking, placement lots, short-format singles.
Scoring	Configurable rules engine (golden point, tie-breaks, super tie-break, short sets, Fast4…); point-by-point or final-result entry with double confirmation; audited corrections.
Referee consoles	Web and mobile, offline-first with ordered sync, one device per match with hand-over, voice umpire (spoken calls), red/blue identity, sunlight mode.
Match day	"Match may start in ~5 min" alerts, court calls with countdown, "I'm at court", no-show prompt and walkovers.
Public web & screens	Public tournament sites, live pages, brackets, rankings; venue TVs with automatic scenes (line-up, walk-on, live score, results), sponsor content and remote operator control.
Mobile app	Discover with live-courts showcase, follow players/nations/matches without an account, alerts, iPhone Live Activities with push-to-start, home/lock-screen widgets, event pass with venue QR stamps, Apple/Google Wallet, Apple/Google/email/player-code sign-in.
Players & leagues	One global player profile and history; leagues (nights or season fixtures), divisions, editable points, monthly to yearly boards, top of all leagues, visibility options, Americano/Mexicano nights with estimated times.
Registration & payment	Team/individual registration, first-paid-first-in capacity, XPay card payments, refunds until 24 h before start.
Messaging	Push, branded email and WhatsApp announcements with delivery tracking.
Security	Row-level security, hashed codes, signed sessions and webhooks, rate limits, automated cross-organisation attack tests, privacy and account deletion.

To be quoted as new modules

- PLANNED **Per-court referee access**: one code per court, referee sees only that court's matches; QR code on each court's table switches the referee to that court.

- PLANNED **Live video feed of selected courts**: camera ingest, low-latency streaming to app and web, live score overlay from the scoring data, replays and highlights, access control, stream health dashboard.
- PLANNED **Professional referee system (international sport-code level)**: full point-outcome capture, code of conduct and point-penalty scale, shot/changeover/medical timers, challenges, officiating team assignment and certification levels, referee's office dashboard, signed scorecards, official statistics and federation export (ITF/FIP/FIDE).
- Option: Arabic language and RTL layout.

Reference technology

Next.js + TypeScript web and API (Vercel), PostgreSQL (Supabase), React Native/Expo app with native iOS widgets and Live Activities, shared TypeScript domain library. Integrations: Apple, Google, APNs, Expo push, Apple/Google Wallet, Resend, WhatsApp Cloud API, XPay, Sentry. Equivalent stacks are acceptable.

Please include in your quote

- Price and timeline per module (built modules A–J and new modules K–M, see the full document §22).
- Team composition, technology stack, monthly hosting and third-party costs.
- Source-code and IP ownership, warranty, maintenance and live-event-day support SLA.
